

## Shipping Info

**Shipping Information** Usually, our customers already have their own cargo agent in Bali, who is handling the shipment to their places, but if you are the new customer, please give us your complete address, and also the approx volume that you want to ship, I will give you complete information about the shipping cost. Or, you can just give us the products code and quantity that you need, we will inform you the Shipping cost.

Usually our clients ship with 20ft. or 40ft. container with orders worth approximately US\$ 5,000.00 to US\$ 10,000.00 and US\$ 12,000.00 to US\$ 20,000.00 respectively -- sometimes even smaller for orders worth US\$ 2,000.00 to US\$ 5,000.00.

Our clients understand that there are great savings in freight costs if they use container to ship, while there are still some clients who repeatedly order by LCL (less than a container load). We want to make our clients aware, that they can waste lots of money by shipping their merchandise due lack of information or lack of sufficient funds to order larger quantities.

5 ways to ship your order from Bali to you:

1. 20ft. Container (30 cubic meters)
2. 40ft. Container (60 cubic meters)
3. 40ft. High Cube Container (72 cubic meters)
4. LCL Sea Cargo (less than a container - charged per cubic meter)
5. Air Cargo

LCL and Full Container Load (FCL)

( recommended, because more effectively cost )

The enclosed steel containers are available in 2 sizes 20 ft, 40 ft, and 40 ft jumbo, provide the customer with loading space of 30, 60, 72 Cubic Meter respectively, or roughly 300, 600, 720 normal size shipping boxes.

This type is the most commonly used in the cargo field. The Advantages of using the enclosed container are product protection and safety, and allowing the most economical use of space. Less Container Load (LCL)

This service is dedicated to those shipment whose space is insufficient to fill a 20 ft container. Shipments are individually crated and consolidated on freight carriers bound for intended destination. L.C.L. loads are appropriate for sending smaller shipments, samples, gifts and personal items. Orders less than a container volume are calculated by the cubic meter. Please contact us for more information regarding shipments of less than a container volume.

### Air Freight

Air Freight is fastest way to ship, but also the most expensive one.

Cargo do charge by the kilo, but in addition, also by volume, whichever happens to be greatest. A standard carton box is 50 x 58 x 33 cm (20 x 23 x 13 inches). According to the cargo calculation, that carton's volume is equal to about 15 kilos. If there is less than 15 kilos of product in that carton box, then you still will pay for 15 kilos. If there is more than 15 kilos, you pay the greater amount. Let's say the air cargo rate for you is about \$4.00 per kilo which means that carton costs you in cargo expense at least \$60.00. In some cases you will have paid more for the cargo than you paid us for the handicraft.

### Shipping Time by Sea Freight

Shipping to most International ports takes approximately 4 weeks from Indonesia. Shipping to Asia/Southeast Asia destinations are approximately 2 weeks.

### Shipping Cost by Sea Freight

Cost of shipping depends on the shipping destination and volume or quantity of the shipment, All of our shipping quotes include documentation fees, local handling & trucking fees, packing & stuffing fees, port loading fees and all other local charges levied in the packing and delivery of your container to the port. D.D.C. fees (Document & Destination Charge) levied by the port of destination are not included. Some International ports charge a D.D.C. fee upon the arrival and handling of your shipment in your local port. Please do check with your customs department for more information on D.D.C. charges. When you contact us we will give you a definitive quote for your destination.

**Cargo Rates** If you want us to take care about your shipment, we will. We have all the necessary connections here to reliable Shipping companies and it is our Service to get the best available Rates for requested destination. After

receiving your query for an order we will check for Cargo Rates with different shipping companies and forward you only the best deal we can get. You always can check for yourself to get even better Rates if you intend to do so.

Insurance Insurance for your shipment can be purchased in Indonesia from the cargo company, but you can check with your local insurance agent where you usually buy your insurance's, like for your house or car. Generally, when we receive an order, we will estimate costs for the shipment, which is not always very easy because the weight of handicrafts of the same sort always may vary in the same way as the look. We talking about handicrafts and that's the nature of this category. Sometimes we also advise to up- or downgrade the volume of your order to get the best deal for your shipment. Hopefully all this gives you a better spectrum for your decision making. Our Team is always working hard to improve the way to work efficient and cost-effective for our clients.

So, why you do not give it a try! Some Photos of furniture / gazebo that we sent to some countries{zoomcat catid=9 }
