

## Devina Prefab House - Gazebo

One of the balinese building is called Gazebo or most people in Bali called them Bales.

Now many country imported gazebo and prefab house with Bali style. We produce high quality of prefab house (knock down system) and gazebo. Mostly our gazebo made from Coconut wood, Bingkirai HardWood and Merbau HardWood with some variety sizes. And also we have some different roof such as Thatched Roof (dried grass / alang-alang), Shingle Roof or most people here called it Sirap / Iron Wood.

We use combination skill with machine tools and hand made techniques to produce our prefab and gazebo. Our production time depend on the project, but usually for example for Standard prefab house with 100m2 take 60 days from making until ready for shipping. All our prefab and gazebo come with manual instruction and DVD so you can see step by step how to assemble it in your country. Some portion of wood also include with code sticker to make easier to assemble it. We also will send some picture via email your project phase here so you can monitor your project.

Price for our prefab depend on wood, how complicated and structure of your house but approx from USD 300 to USD 600 per square meter. If you have any question don't be hesitate to contact us , we will glad to help you.
